

## Conveyor systems

### Flexibility for your intralogistics

**You can rely on conveyor technology from Avermann!** The conveyor belts are individually tailored and manufactured for each application in a modular system by precise laser-cutting technology. Various belt qualities enable the safe transport even of difficult bulk materials with oil-bearing and greasy or abrasive components.

## Options

**You specify the details –  
for an optimal setup:**

- Designed as feeding and inclining belt to feed recycling facilities
- Designed as sorting belt
- Designed as intermediate belt or landfill and bunker belt
- Personal protection system

**Your benefits:**

- + **Multifunctional:** Designed as sliding, chain or roller conveyor
- + **Individual:** Conveyor belts for all requirements
- + **Durable:** Solid, torsion-rigid construction
- + **Space saving:** Compact design
