

XCycler

One Clean Operation for Liquide Disposal

The XCycler is the answer for processing large volumes of full plastic or aluminum liquid containers. It dumps, perforates, dewater, crushes and bales in one compact and integrated system.

With two 200 mm hydraulic cylinder the XCycler develops up to 100 tons of press force to drive the liquids out and insure optimum bale density. No runs, no drips, no errors! The XCycler contains & channels liquid to where it belongs.

The smaller-sized Mini-XCycler is available for lower disposal quantities. Both machines from the American manufacturer Sebright Products Inc. are available exclusively from Avermann in Europe.

XCycler/Mini-XCycler

Technical Data

Mini-XCycler

Compact baler

Features

- › Integrate tipping devices
- › Rugged 9.5 mm thick SS teeth
- › Highest security standards
- › Tipper loads and bale ejects to same area

Your Benefits:

- › **Long-lasting:** Stainless steel construction
- › **Varied:** Process plastic and aluminum containers
- › **Powerful:** 7.5 kW hydraulic pump
- › **High throughput:** Process up to 25 m³ per hour
- › **Efficient:** Container volume reductions of up to 95%
- › **Absorbable:** Sump with 833 l capacity
- › **Safety:** Safety locks and dead man's device
- › **User friendly:** PLC control panel

Technical Data

	XCycler	Mini-XCycler
Machine length	5,640 mm	5,590 mm
Machine width	2,160 mm	2,390 mm
Machine height	3,940 mm*	4,120 mm*
Feeding height	2,160 mm	2,160 mm
Weight	13,000 kg	18,600 kg
Liquid volume	900 l	1,100 l
Cycle time (idle)	120 s	60 s
Press force	112 t	44 t
Bale size	1,000 x 760 x 800 - 1,200 mm	760 x 450 x 900 mm
Bale weight PET	up to 400 kg	up to 140 kg
Bale weight aluminum	up to 360 kg	up to 120 kg

*needs min. 4.880 mm room height
